Meet Elizabeth

Elizabeth is a teacher at a local elementary school. During a regular self-exam, she felt something on her breast and scheduled an appointment with her health care provider. She was diagnosed with breast cancer. Three years before her diagnosis, Elizabeth purchased a \$25,000 Flexible Choice Cancer policy which paid her 100% of her \$25,000 selected benefit amount to help pay her expenses as she received treatment.

With her benefits, Elizabeth was able to hire a nanny to watch her daughter and help around the house while she was recovering from her treatments. She used the rest of her benefits to pay her medical insurance deductible and some household expenses. This support let Elizabeth focus more on her recovery and less on how she was going to pay her bills.

Presented for illustration only.

Cancer insurance

A Cancer insurance policy can help pay for treatment costs or any other expenses. So you can focus on your recovery – instead of your financial situation.

Your Cancer policy

A Flexible Choice Cancer insurance policy pays 100% of your selected benefit amount, from \$5,000 to \$75,000, if you are diagnosed with cancer or carcinoma in situ while your policy is in force.

You can use this money to help pay out-of-pocket medical expenses or for any other purpose. This coverage is also available as a rider on a Flexible Choice Heart Attack & Stroke policy (Form series #LY-LSC-RD).

Please refer to page 10 for qualifying event definitions and exclusions and limitations.

While private insurance takes care of many of the costs associated with cancer, patient out-of-pocket costs are nearly \$4 billion per year.³

Heart Attack & Stroke insurance

The costs associated with an unexpected heart attack, stroke or other heart-related surgery can be overwhelming. A Heart Attack & Stroke policy can help you spend less time worrying about money and more time working on your recovery.

Your Heart Attack & Stroke policy

With our Flexible Choice Heart Attack & Stroke insurance policy, you can receive a percentage of your selected benefit amount (\$5,000 to \$75,000) if you receive a diagnosis for one of the qualifying events shown. Benefits can be paid up to the maximum amount of your selected benefit amount.

For example, if you selected a \$20,000 benefit amount and needed aortic surgery, you would receive 25% of your maximum benefit amount, or \$5,000. If you then suffered a stroke, you would receive 100% of the remaining balance of your benefit amount, or \$15,000. This coverage is also available as a rider on a Flexible Choice Cancer policy (Form series #LY-LSH-RD).

Meet John

When John was 40, he purchased a Flexible Choice Heart Attack & Stroke insurance policy with a benefit amount of \$50,000. He also purchased a Benefit Builder rider which increased his benefit amount by \$1,000 each year.

When John was 65, he suffered a heart attack. He was thankful he had purchased the policy and rider when he was younger and in a lower premium age bracket. Since the premium was cost effective, he was able to keep it for 25 years and now his original \$50,000 policy was worth \$75,000.

How a Benefit Builder rider worked out for John

Lump Sum Heart Attack & Stroke policy benefit	\$50,000
Benefit Builder rider (\$1,000 x 25 years)	\$25,000
Total payout	\$75,000

Meet Carla
